

Pediatric Provincial Standard Concentration

ISOPROTERENOL INFUSION DOSE CHART

Infusion Concentration: 200 mcg/mL

Weight Range: 0.5 to 10 kg

Final Syringe Size	Mixing Instructions	Minimum Syringe Flow Rate
20 mL		0.2 mL/hr
60 mL	200 mcg/mL - no dilution required	0.6 mL/hr
250 mL bag		-

Compatible IV Fluids: NS, D5W, Dextrose-saline solutions, D5LR, LR and R

The chart below indicates the infusion rate in **mL/hr** based on the following calculation:

$$\text{rate (mL/hr)} = \frac{\text{dose (mcg/kg/minute)} \times \text{weight (kg)} \times 60 \text{ (minute/hour)}}{\text{concentration (mcg/mL)}}$$

Patient weight (kg)	<i>isoproterenol dose in mcg/kg/minute</i>
